The Correction Is Finally Here

Equity markets sold off last Friday, responding negatively to President Trump's threat of a massive tariff hike on China amid escalating tensions over rare earth exports.

His move followed Beijing's decision to restrict shipments of those critical materials, prompting Trump to also threaten cancellation of his upcoming meeting with China's President Xi Jinping. The S&P 500 fell 2.7% and the Nasdaq 100 declined 3.6% on the news. This pullback aligns with our expectation for a 5%-10% correction, with both indexes now at risk of testing their 200-day moving averages. October is traditionally known as a good buying opportunity leading into the seasonal year-end rally. We remain buyers and maintain that the S&P 500 can reach 7000 by end of the year and 7200 by early next year.

Cboe Volatility Index (VIX) Spikes Higher – Expect Continued Volatility

The equity market has not experienced high levels of volatility since Liberation Day in early April. Last Friday's sell-off produced a spike in the Cboe Volatility Index (VIX) above 20. We expect volatility to remain elevated for a short period of time. Historically, when the VIX is above 20, it has signaled a good buying opportunity.

2-Year Treasury Yield Breaks Down Pointing To Continued Lower Short Rates

As stocks tanked last Friday, money fled to safety, driving the 2-Year Treasury yield down, breaking support and pointing to a move toward 3.4%. Interest rates remain in a downtrend, which should support risk assets as we enter the seasonally strong period for equities in November and December.

Peace For The Middle East Lowers Oil Prices

Last week, President Trump helped broker a peace agreement between Israel and Hamas. The Israeli government approved the deal, paving the way for a cease-fire in the two-year conflict in Gaza and the release of the remaining hostages held by Hamas. It's a profoundly hopeful step toward healing after too much suffering. While the news had little effect on equity markets, it did weigh on WTI crude oil prices as the war premium came out of the market. Additionally, supply remains abundant, and this had oil prices fall to \$58.90 and technically tracking to \$55-\$50. The decline in oil prices should act like a tax cut, giving consumers a boost heading into the holiday season. That extra cushion could keep spending on track and make for a genuinely jolly holiday. The main risk would be a sudden cold snap that firms up prices again.

Crude Oil Trending Down Toward \$55-\$50

Where Is The Consumer Now?

Both high- and low-income consumers are spending, with higher-income households purchasing at roughly twice the rate. We believe lower oil prices will give the consumer more spending money going into the holiday season. This should also keep the economy strong, allowing companies to continue to grow corporate earnings.

Sector Readings: Information Technology Repeats As Strongest, Consumer Staples Weakest Again

Information Technology remained in the lead position last week, while Communication Services stayed in second place. These two sectors have swapped the top two positions for the past 18 weeks, since June 13. Consumer Staples was in last place, followed by Real Estate, then Energy.

A sector rotation is underway to relieve the overbought and oversold conditions within the market. We maintain that Growth sectors should continue to outperform Value sectors.

Our sector model analyzes S&P 500 GICS sector classifications, using a weighted measure of price momentum across three time periods. We rank each sector from best to worst based upon the average of its 40-, 26-, and 13-week relative price performances. We rank each sector from 1-11 with 1 being the strongest and 11 the weakest.

Sector Rankings By 40-, 26-, And 13-Week Average Relative Price Performance

	Oct 10	Oct 3	Sep 26	Sep 19	Sep 12	Sep 5	Aug 29	Aug 22
Consumer Discretionary	5	5	5	3	3	3	4	4
Consumer Staples	11	11	10	9	8	8	10	8
Energy	9	9	7	10	10	10	8	10
Financials	6	6	6	5	5	5	5	6
Health Care	7	8	11	11	11	11	11	11
Industrials	4	3	3	4	4	4	3	3
Information Technology	1	1	2	2	2	2	2	1
Materials	8	7	8	7	7	7	7	7
Communication Services	2	2	1	1	1	1	1	2

OBOS List: Communication Services And Utilities Near Overbought; Materials, Industrials, And Consumer Staples Oversold

Earnings growth remains strong in Communication Services, which was near overbought last week, as was Utilities. Utilities is typically a defensive sector, and the market's sudden decline likely contributed to its recent strength; however, the group also appears to be benefiting from expectations of rising electricity demand from data centers. There were three outright oversold sectors, Materials, Industrials, and Consumer Staples. Energy, Real Estate, and Financials were near oversold.

The extreme overbought and oversold readings that have prevailed over the past few months appear to be finally shifting and undergoing a tactical sector rotation.

Our tactical sector rotation model uses the S&P 500 GICS sector classifications. We apply a 13-week rate of change methodology that normalizes the rankings from overbought (OB) to oversold (OS). An industry group is overbought when it has risen too far too fast, relative to the rest of the market, based upon its normal movement. Conversely, it's oversold when it has lost too much too fast, relative to the rest of the market, based upon its normal movement. Over time, a sector tends to move back toward its normal rate of change, relative to the rest of the market. Overbought sectors tend to slow their pace of gains in relative price, while oversold sectors tend to improve in relative price until they reach their average performance again.

Here's our methodology: the overbought-oversold table of sectors measures the 13-week rate of change in the relative price of each sector. We then average (i.e., smooth) this for 3 weeks and normalize the results. Normalized oscillator values over 1.0 are considered overbought, while those between 0.6 and 1.0 are considered near overbought. Normalized oscillator values below -1.0 are considered oversold, while those between -0.6 and -1.0 are considered near oversold.

Sector Overbought / Oversold List as of 3 October 2025

rank	S&P Sector	normalized Oscillator
1	Communication Services	0.8246
2	Utilities	0.7136 <i>Near Overbought</i>
3	Information Technology	0.5133 <i>Neutral</i>
4	Health Care	0.0129
5	Consumer Discretionary	-0.3671 <i>Neutral</i>
6	Financials	-0.7148 <i>Near Oversold</i>
7	Real Estate	-0.8509
8	Energy	-0.9448
9	Consumer Staples	-1.1169 <i>Oversold</i>
10	Industrials	-1.1969
11	Materials	-1.2399

'Tis The Season of 3Q25 Earnings

This week, earnings reports will command the headlines as economic data remains MIA.

This week, the Banks kick off earnings season, announcing their 3Q25 results. With economic data releases on hold due to the government shutdown, earnings will be the main driver of market performance over the next few weeks. For now, the market still expects the Federal Reserve to continue its rate-cutting cycle later this month.

Calendar

Mon.	12:55 pm	Philadelphia Fed President Anna Paulson speaks
Tue.	6:00 am	NFIB optimism index
	8:45 am	Fed governor Michelle Bowman speaks
	3:25 pm	Fed governor Christopher Waller speaks
	3:30 pm	Boston Fed President Susan Collins speaks
	Earnings	JPMorgan Chase, Domino's Pizza***
Wed.	8:30 am	Empire State manufacturing survey
	12:10 pm	Atlanta Fed President Raphael Bostic speaks
	12:30 pm	Fed governor Stephen Miran speaks
	1:00 pm	Fed governor Christopher Waller speaks
	2:00 pm	Fed Beige Book
	Earnings	Bank of America
Thu.	8:00 am	Richmond Fed President Tom Barkin speaks
